

Today's Date in Excel

To enter today's date in Excel, use the TODAY function. To enter the current date and time, use the NOW function. To enter the current date and time as a static value, use keyboard shortcuts.

◆ TODAY and NOW

First, we'll use functions to automatically enter the current date and time in Excel.

1. To enter today's date in Excel, use the TODAY function.

The screenshot shows an Excel spreadsheet with the formula bar set to `=TODAY()`. The active cell is A1, and it displays the date 11/16/2023. The spreadsheet has columns A through H and rows 1 and 2 visible.

	A	B	C	D	E	F	G	H
1	11/16/2023							
2

[Excel](#)[Microsoft Excel](#)[Online learning community](#)

Note: the TODAY function takes no arguments. This date will update automatically when you open the workbook on another date.

2. To enter the current date and time, use the NOW function.

The screenshot shows an Excel spreadsheet with the formula bar set to `=NOW()`. The active cell is A1, and it displays the date and time 11/16/2023 14:25. The spreadsheet has columns A through H and rows 1 and 2 visible.

	A	B	C	D	E	F	G	H
1	11/16/2023 14:25							
2								

Note: the NOW function takes no arguments. This time will update automatically whenever the sheet is recalculated. This happens when you make a change to any cell or when you open the workbook. Press F9 to manually recalculate the workbook.

3. To enter the current time only, use the formula shown below and apply a [time format](#).

A1								
	A	B	C	D	E	F	G	H
1	14:26							
2								

Note: dates are stored as numbers in Excel and count the number of days since January 0, 1900. Times are handled internally as numbers between 0 and 1. Visit our page about [date and time formats](#) for more information.

◆ Static Date and Time

Next, we'll use keyboard shortcuts to quickly insert the current date and time as static values.

1. To enter the current date as a static value, press CTRL + ; (semicolon).

A1								
	A	B	C	D	E	F	G	H
1	11/16/2023							
2								

Note: this date will not change when you open the workbook on another date.

2. To enter the current time as a static value, press CTRL + SHIFT + ; (semicolon).

A1								
	A	B	C	D	E	F	G	H
1	2:27 PM							
2								

Note: this time will not change when you make a change to a cell or when you open the workbook.

3. To enter the current date and time as a static value, simply press CTRL + ; (semicolon), enter a space and press CTRL + SHIFT + ; (semicolon).

A1								
	A	B	C	D	E	F	G	H
1	11/16/2023 14:28							
2
